

EVENT DESCRIPTION

EL-EFF Region

Title: Tools for regional and local energy planning

Date & location: 5-6 February 2009, Skövde

Organiser: KanEnergi Sweden AB and Hållbar Utveckling Väst

Number of Participants: 299

Short description:

The municipalities and regional administrations different roles as authority, informer, educator, owner, investor gives large possibilities to influence and speed up the development of the energy system. Through proactive planning, good tools, effective measures and supporting actions the right circumstances for an effective use of energy can be created. The workshop gave a presentation of a range of these as well as a discussion about the interaction between different stakeholders and needs and barriers.

The County Governor Mr Lars Bäckström held a much appreciated speech at the final plenary assembly

Background:

The regional energy conference “Energisession” was arranged for the fourth year. This conference has developed to become the natural meeting point for stakeholders and decision makers in line with the development of renewable energy and energy efficiency within the vaster Götaland region.

This year 12 different sessions was arranged during the two day conference. One of the sessions was highlighting local and regional energy planning and its impact on energy use such as electricity in households, industry and services. The session had 37 participants of the about 300 in total for the conference.

Aim & programme:

The aim with the event was to present a range of tools and measures for improved energy planning as well as a discussion about the interaction between different stakeholders and needs and barriers.
