

## EVENT DESCRIPTION

### EL-EFF Region

**Title:** Electricity efficiency in the households

**Date & location:** 27<sup>th</sup> May 2008

**Organiser:** Energy Centre České Budějovice

**Number of Participants:** 38

#### **Short description:**

ECČB organized a seminar called Electricity efficiency in the households. It took place on 27.5.2008 in České Budějovice. In the beginning the EL-EFF

region project, activities of ECČB and results of the regional survey among households and of the stakeholder survey were introduced. After that participants could hear two lectures on “Possibilities of electricity savings in households” and learn some practical tips concerning this topic. In the second half of the seminar it was reported on electricity savings at heating and ventilation, composition of electricity price and choice of an electricity supplier. The concept of the virtual advisor and calculator of ECCB was briefly introduced as well. The seminar was targeted to general public. As for the participation of stakeholders, all the seminar speakers were chosen from various stakeholder sectors and it was possible for participants and stakeholders to exchange their ideas and opinions during the discussion.

Invitation was sent to 430 households, it was released on several websites. Seminar proceedings (32 pages) were printed in 40 copies. 6 speakers were participating.

#### **Background:**

Electricity prices in the Czech Republic are continuously and rapidly growing (on the average about 9.1 % growth between 2007 and 2008). Electricity efficiency is therefore a actual topic to talk about.

#### **Aim & programme:**
