

Title: SECOND SECTOR TECHNICAL SEMMINAR

Dates & location : 14th November 2008, Madrid, 9:15-14:30h, Premises of PROMOMADRID (Spanish and English)

Number of Participants: 202

Short description:

Partners of the EL-EFF-REGION project participated in this very interesting event as speakers, favouring the European cooperation and information interchange. Their experience was very valuable for the audience.

Technical Semminar organised by ESCAN for the second sector (Social Residences) had the following Agenda:

- Welcome and start
- EL-EFF-REGION project presentation
- Electric efficiency in the Regional Energy Plan
- Energy Audit: the first step to save energy
- Improvements on electric efficiency and production of solar PV in the buildings of the Regional Gov.
- Promoting electric efficiency at the Domestic Sector
- Consumption reduction in the tertiary sector buildings
- Rational use of energy in indoor lighting and electric motors
- Energy saving in industrial machinery
- Discussion
- End of day

The main conclusions were:

- The event on electric energy efficiency organised by ESCAN, in cooperation with the Reg. Government and the Reg. Energy Agency, and with EL-EFF-REGIONS partners as speakers (translation available) has been again pioneer in the Region of Madrid
- The seminar was followed by senior building managers, equipment producers, regional authorities and installers and maintainers. Their future actions affected by the information and experiences showed in the event will be relevant.
- The request for attendance to the event were double of the room capacity. There is an intention to continue this event format in the 2009 year to cover the demand.
- The participation of partners experts as speakers, together with local experts, offered the possibility of experiences interchange and better understanding among European countries

Background:

The *Second Sector Seminar – Social Residences* - was organised with the aim of presenting the updated information produced in the EL-EFF-REGIONS project for this sector, inside the Public Campaign delivered by the project.
